

Agri-Energy Connect Platform User Manual:

Link to Video Explaining Website: <https://youtu.be/F4h0XNHtqAY>

Before Running the Application:

- Download the ZIP File and Extract
- Go to Tools, Package Manager Console (PMC)
- Run Migrations in the PMC (add-migration "MigrationName", then update-database afterwards)
- My Database name is AgriEnergyConnectDb and will be on the Local SQL in Visual Studio.
- To view the database, go to View, SQL Server Object Explorer

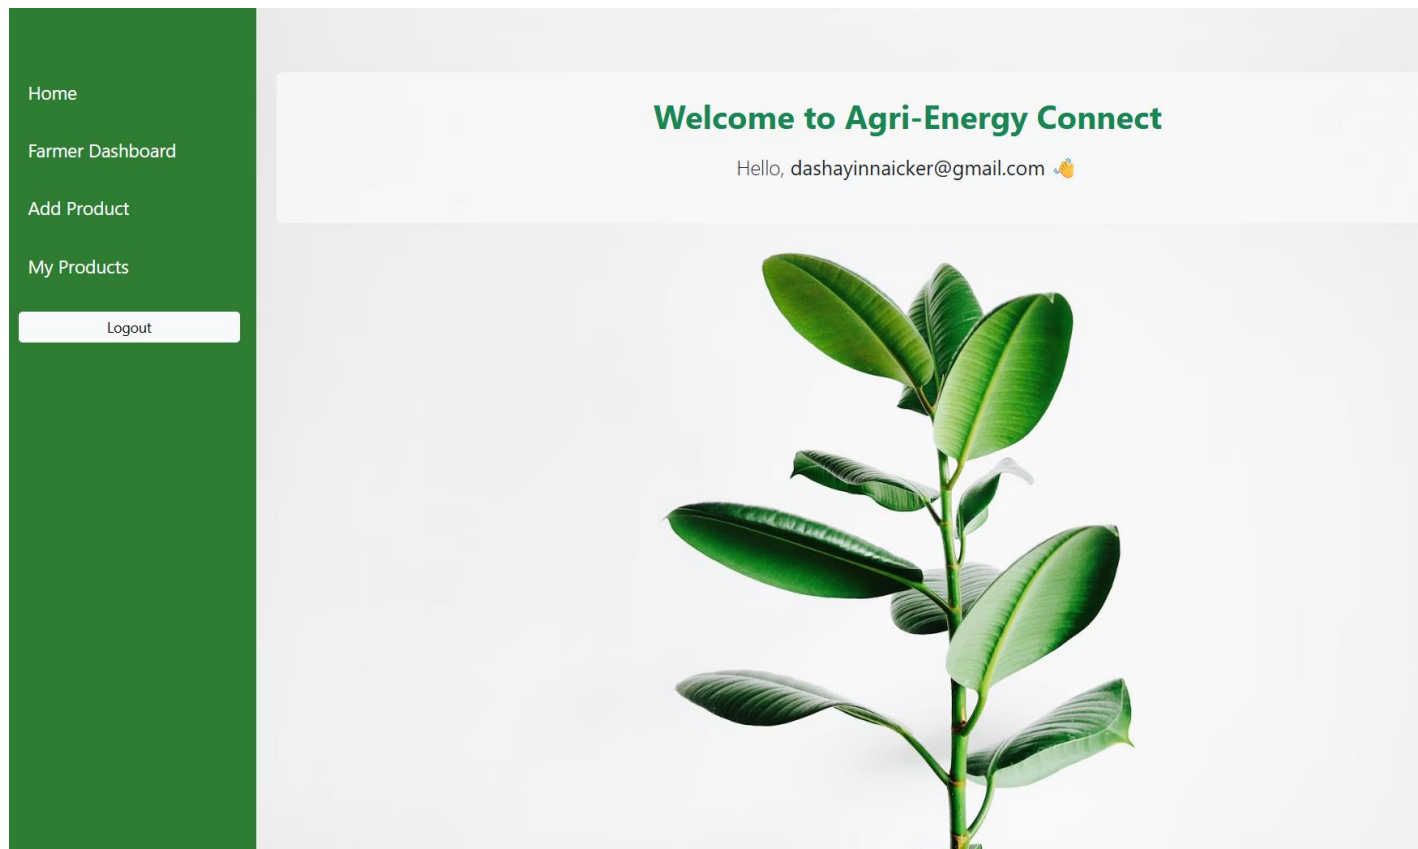

After Running Migrations:

Login/Register Functionalities:

- Run the Application (Ctrl+f5)
- The Home page will be displayed; there will be two tabs for navigation. The Home Tab, and Account Tab.
- The Account Tab is a dropdown, hover over Account, and the dropdown will activate giving the user two options: Register or Login.
- The user cannot access any functionality of the website until they Login or Register.
- There are two roles on the website, Employee or Farmer.
- If a user does not have an account, they can register as a Farmer only and not an employee. I made it this way to ensure security for the website. They cannot register as an employee because then anyone can come on the website and register as an employee and have Administrative Rights on the website.
- An employee that already is in the database must Login and they can now Register another employee. An employee also has the Option to Register a Farmer.
- Validation has been added to the Login/Registration pages so the user will be guided throughout the Process.

Login/Register as a Farmer:

- The user will automatically be logged in after they register.
- If the user has an account, they must Log In before accessing the website's functionality.
- After logging in, the user is automatically redirected to the Farmers Dashboard.

- On the Farmer Dashboard, there is a Navigation Panel on the left.
- The Farmer has the option of adding a product to the Database and then viewing all their products.

The image shows the 'Add a New Product' form within the same application. The sidebar is identical. The main content area has a light gray background with the title 'Add a New Product' in bold green. Below the title is a subtitle: 'Fill in the form below to add a new product to your farm's inventory.' The form consists of three input fields: 'Product Name' (a simple text box), 'Category' (a text box with a light gray background), and 'Production Date' (a date picker showing '2025/05/13' with a calendar icon on the right). At the bottom of the form is a green 'Add Product' button. A partial image of the green plant from the previous screenshot is visible at the bottom right of the form area.

Here is a list of all the products you have added to your farm's inventory.

#	Product Name	Category	Production Date
1	Corn	Maize	2025-05-11
2	Corn	Maize	2025-05-11
3	Corn	Maize	2025-05-11
4	Corn	Maize	2025-05-11
5	Milk	Dairy	2025-05-11

Login as an Employee:

- If the user has an account, they must Login before accessing the website's functionality.
- For an employee that isn't registered yet, they cannot do it on the website by themselves, a registered employee has to create an account for them.
- After logging in, the user is automatically redirected to the Employees Dashboard.
- On the Employee Dashboard, there is a Navigation Panel on the left.

Welcome to Agri-Energy Connect

Hello, dashy@gmail.com 🍌

- From this dashboard, the employee has the option to create a new Farmer's Account. Additionally, they can register another Employee from here.

Both Employees and Farmers:

- Both Users have the option to Logout from either the Home Page or their Respective Dashboards.

Validation:

- Validation has been done throughout the website and will not crash. The users will be appropriately navigated or informed.
- Users trying to access a page that they don't have authority to (e.g. A farmer trying to access the Employee Dashboard), will be redirected back to the home page.

UI Design:

- The Frontend has been designed using Bootstrap templates and will be functional for mobile devices as well.
